

ADABAS & NATURAL

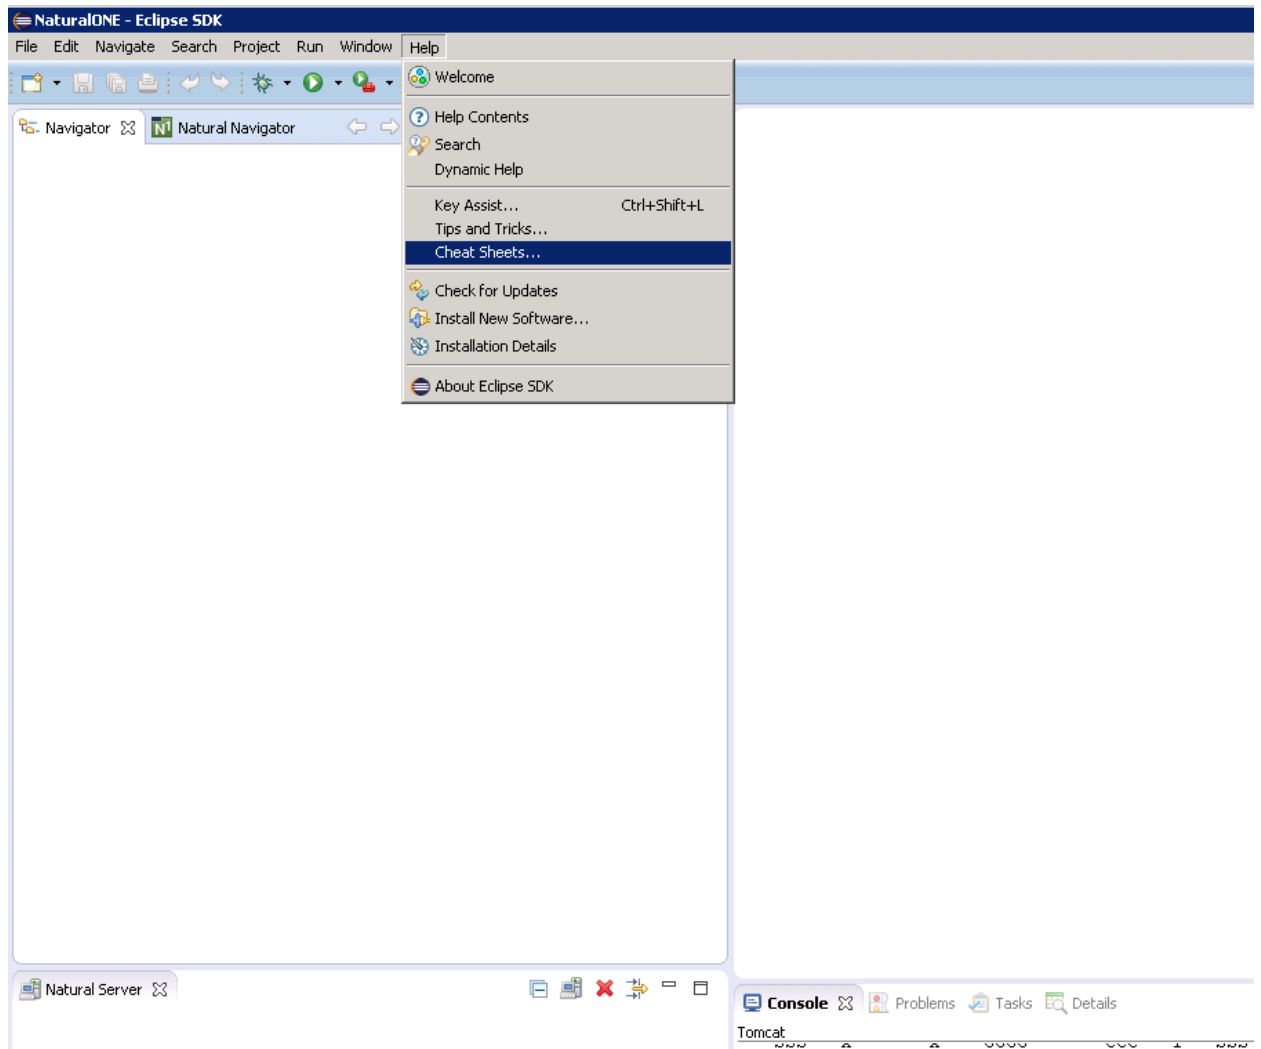

BY SOFTWARE AG

NaturalONE is an Eclipse based platform, integrated with the Adabas and Natural components and used as an IDE here.

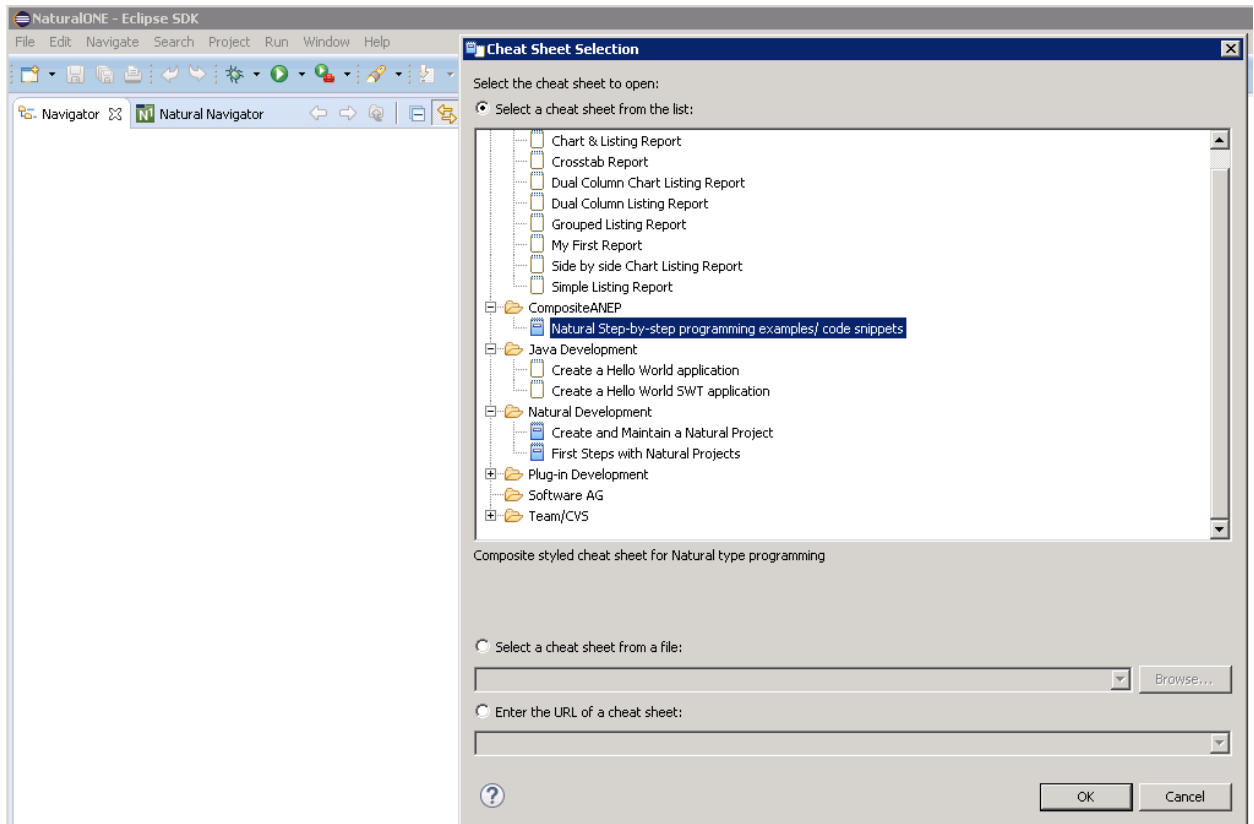

Cheat Sheets is an Eclipse way to prepare a simple step-by-step programming tutorial and used here to assist you in understanding Adabas and Natural basic constructs.

Steps to run the Cheat Sheets:

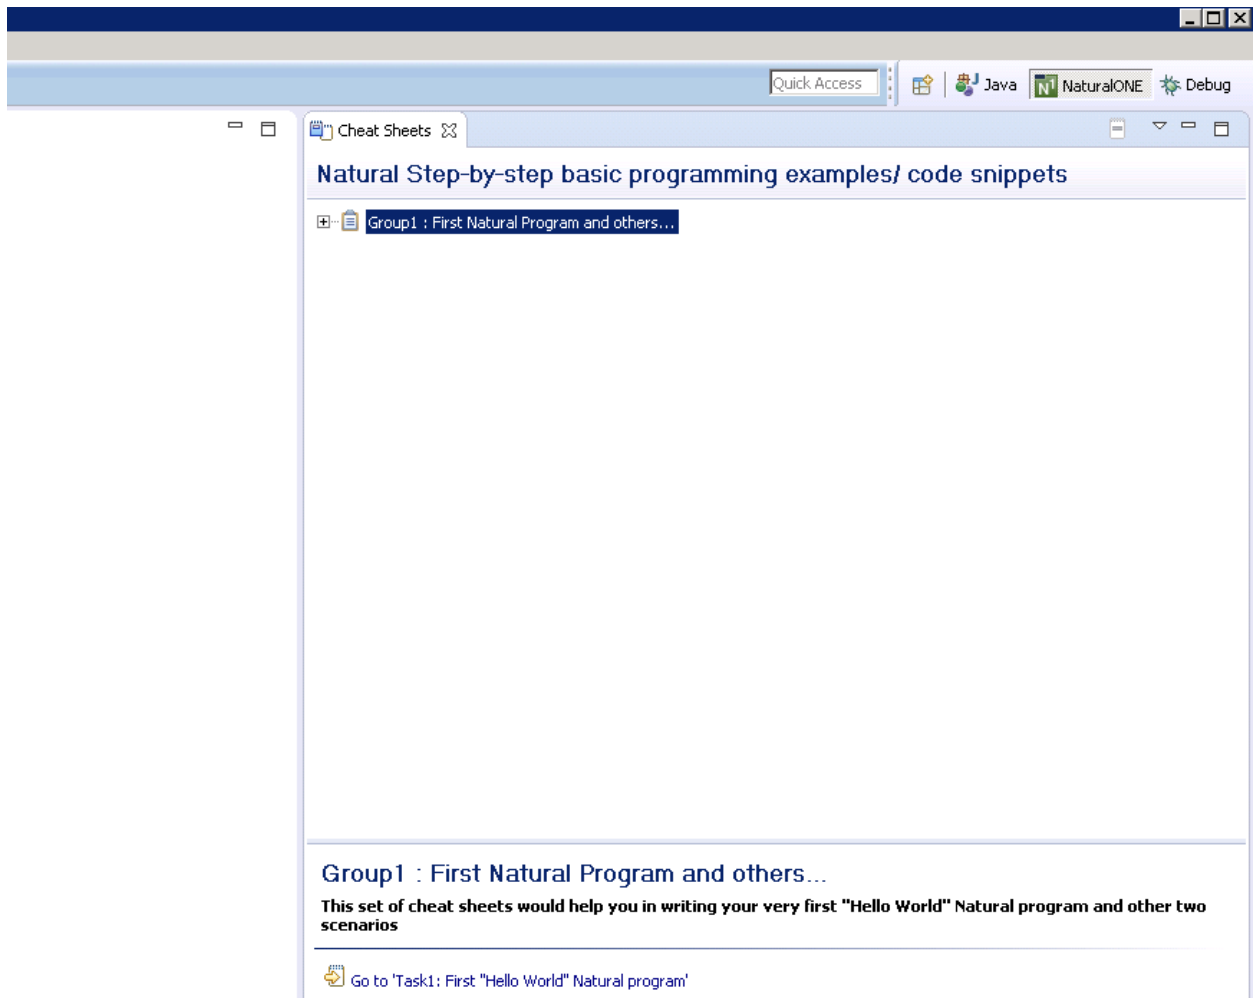

- Run the Software AG Designer from your Desktop/laptop computer.
- Click on the Help menu from top and choose Cheat Sheets as shown in the screenshot below...

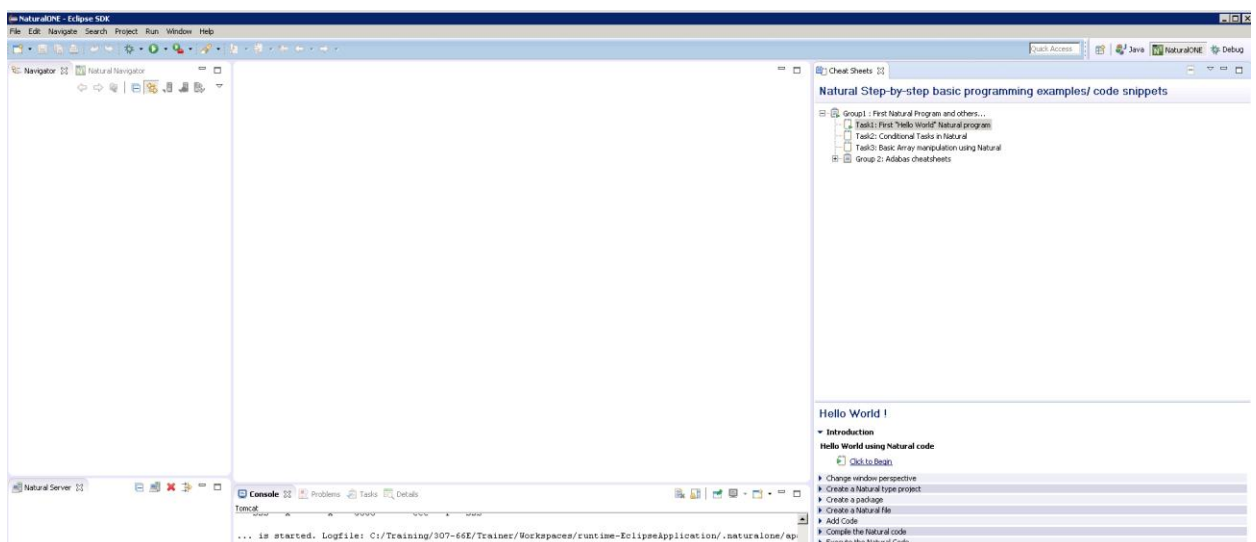

- Now, choose and click the CompositeANEP menu-item, as shown in the screenshot below...

- And click OK.
- You can now see, on the right-pane of the IDE a side-bar named Cheat Sheets, similar to below screenshot...

- Go on and click in the link *Go to Task1: First Hello World Natural program...*
- And then click on the link *Begin Task...*and now you can start working upon the tutorial steps...

- In case of any issues, kindly send an email to UniversityRelations@softwareag.com
